Tinkerbell Asks:

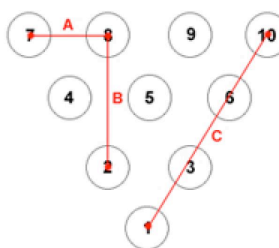

What is the pin rack?

Surprisingly, it is not the storage place for Bill Downey's brooch collection. It is another name for the deck of pins.

*How far apart are the
bowling pins?*

The neighbouring pins are 12 inches (30 cm) apart measured from centre to centre. (see A)

Pins directly behind each other are 20.75 inches apart. They are called Sleeper pins. (see B)

(If they are sleeping, why won't they fall down?)

Each side of the pin triangle is 36 in. (see C).
